

# Flux: Stores vs. Services

Anthony P. Alicea

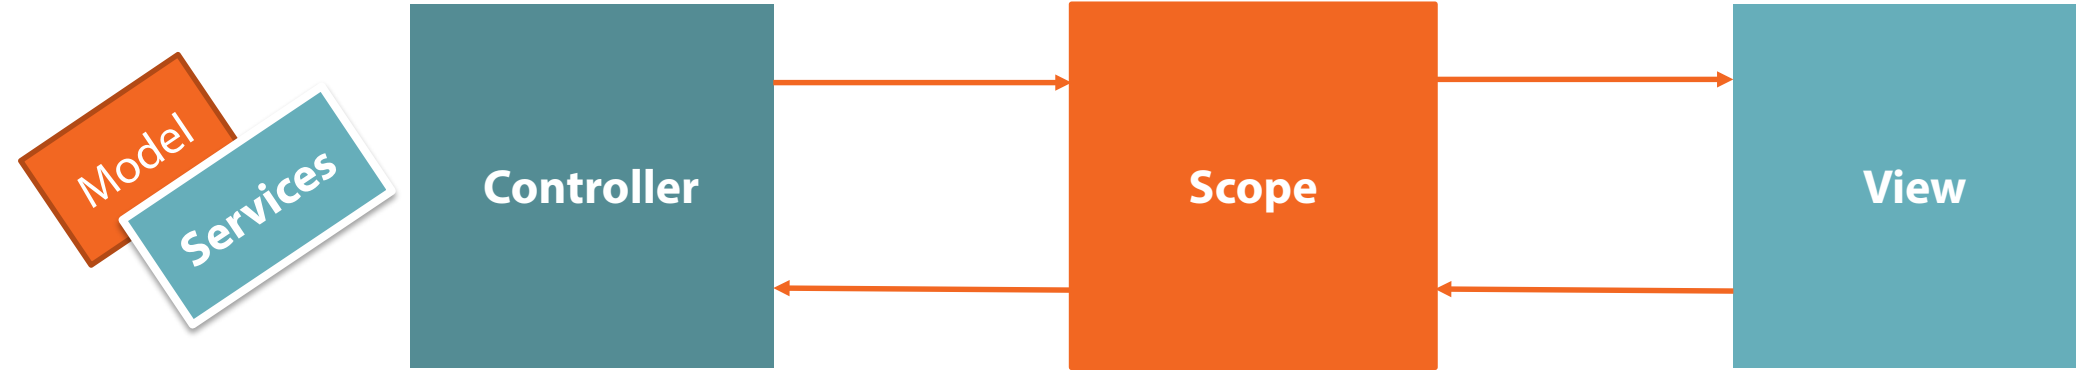

@anthonypalicea | [www.learnwebdev.net](http://www.learnwebdev.net)

# Module Overview

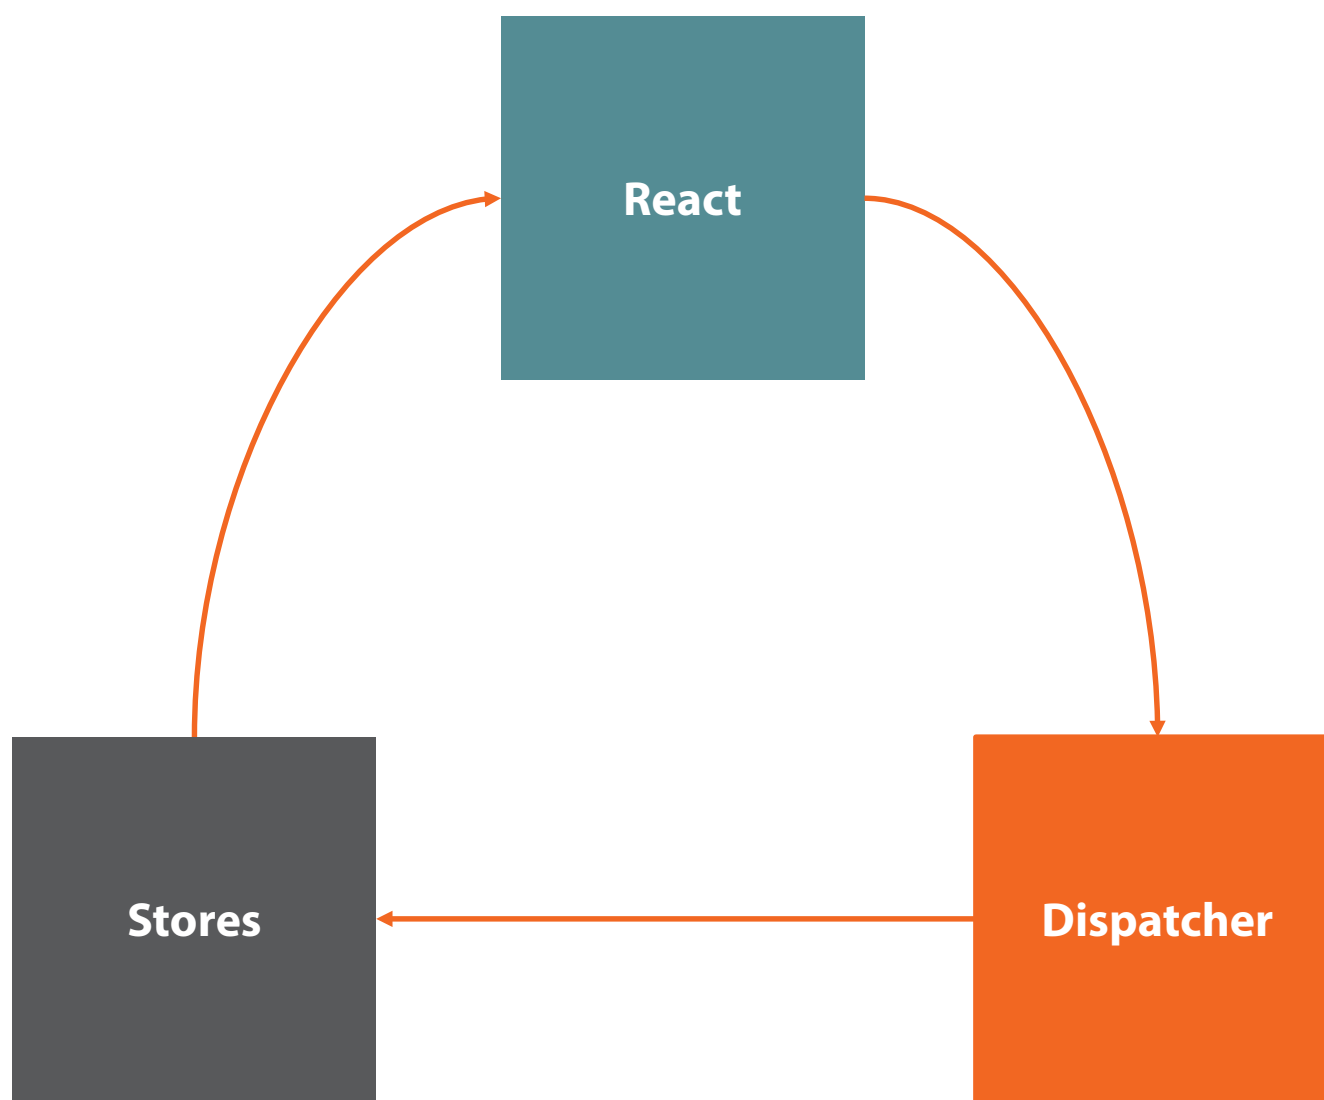

Stores

Completing the one way data flow

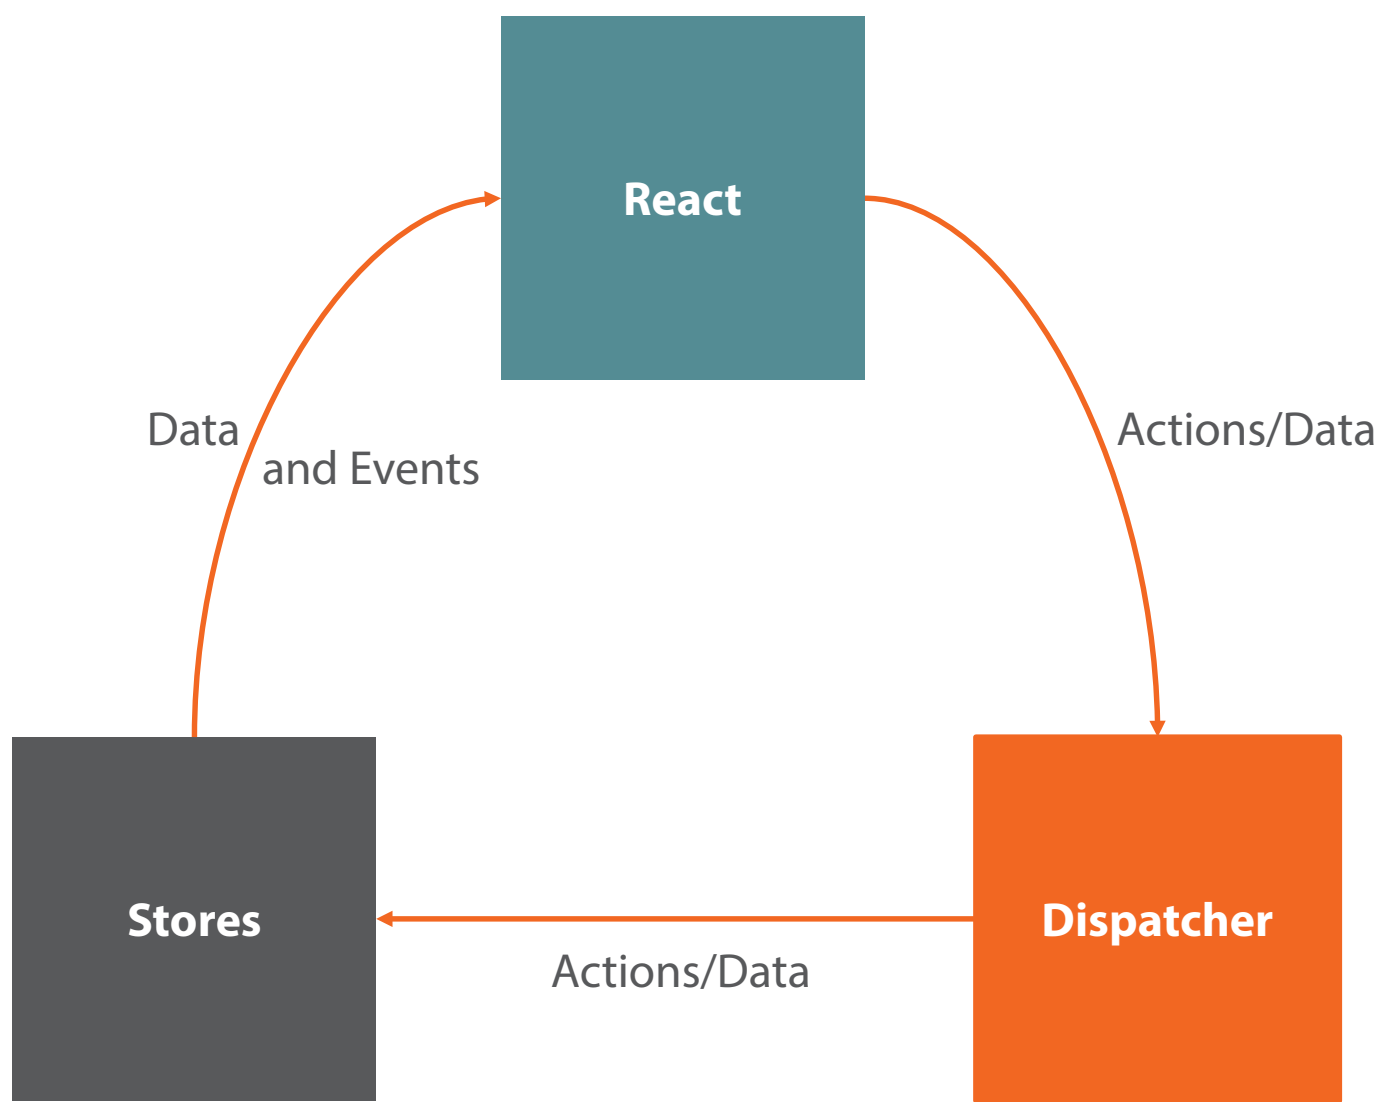

**Two way data flow**

**One way data flow**

## Stores

Event emitters that make **data** available, handle **business logic**, send **events** to React, and **listen** for dispatched actions.

**One way data flow**
