# Component

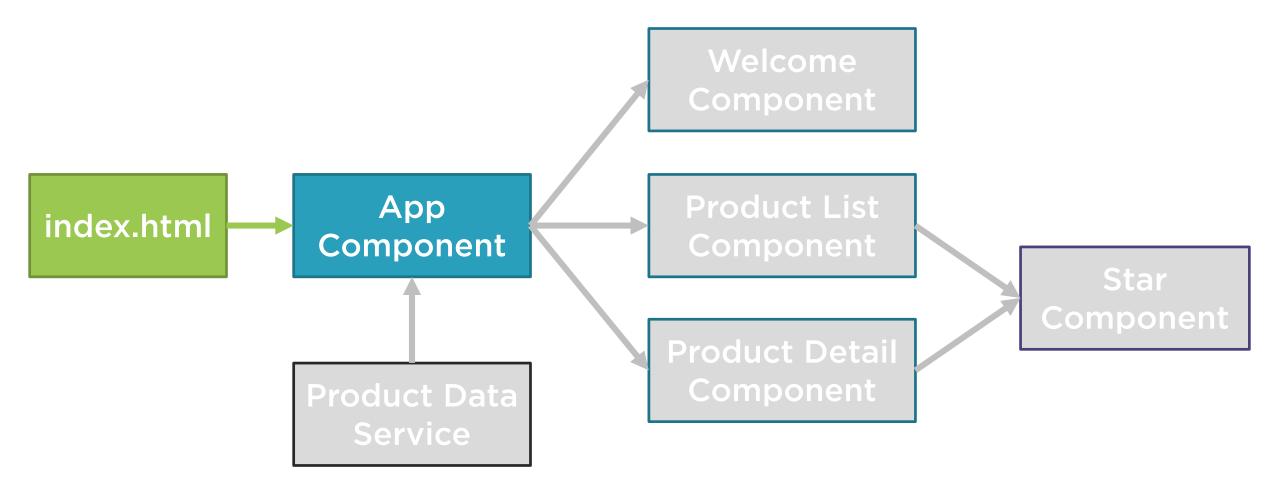

# Module Overview

Building a Template
Using a Component as a Directive
Binding with Interpolation
Adding Logic with Directives

# Application Architecture

### Component

```
import { Component } from 'angular2/core';
@Component({
    selector: 'pm-app',
    template: `
    <div><h1>{{pageTitle}}</h1>
        <div>My First Component</div>
    </div>
export class AppComponent {
pageTitle: string = 'Acme Product Management';
```

# Defining a Template in a Component

### **Inline Template**

```
template:
"<h1>{{pageTitle}}</h1>"
```

### Inline Template

ES 2015 Back Ticks

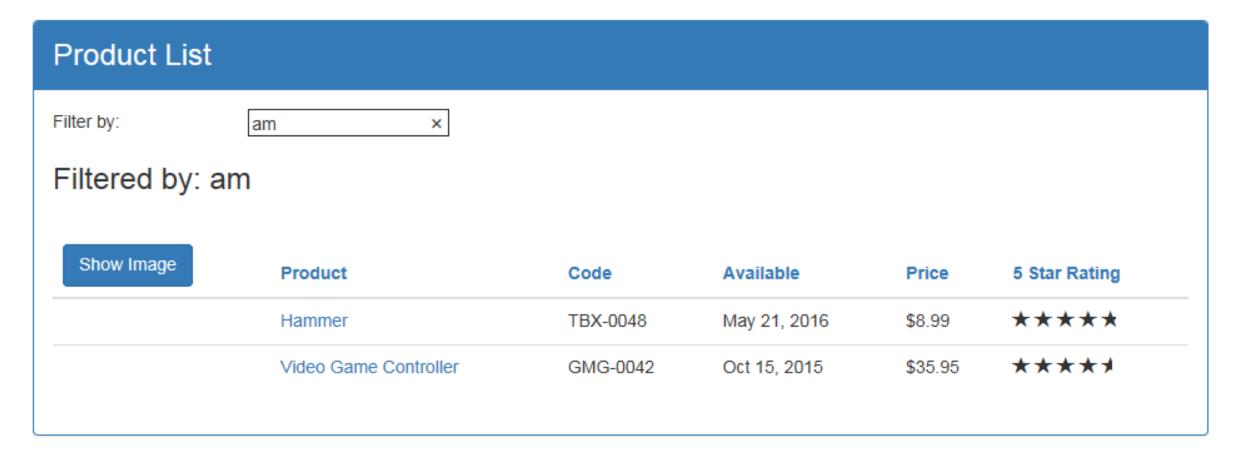

### **Linked Template**

```
templateUrl:
'product-list.component.html'
```

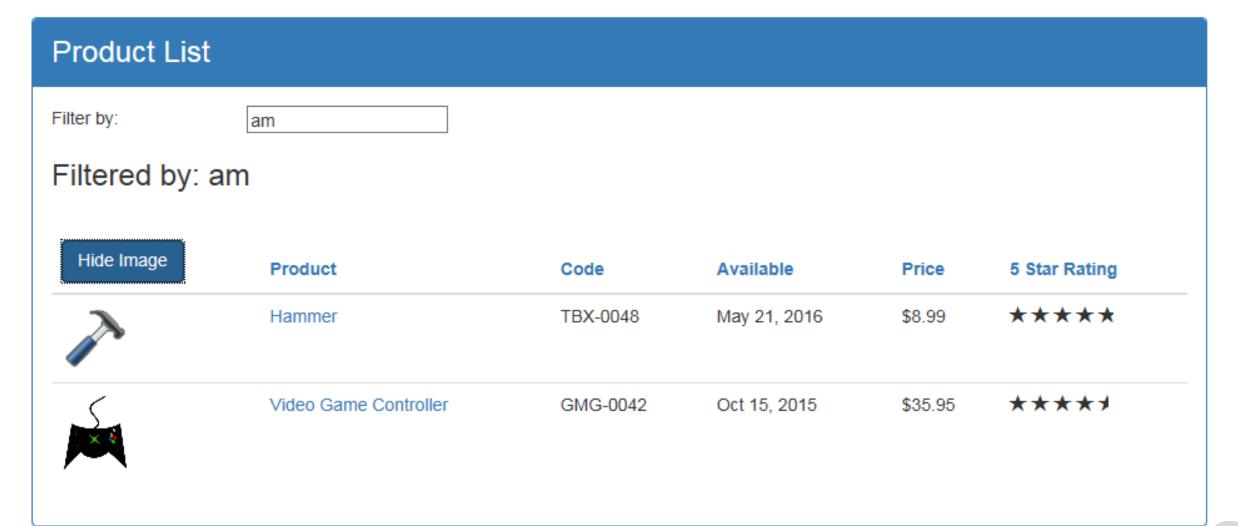

Product List					
Filter by:					
Show Image	Product	Code	Available	Price	5 Star Rating
	Leaf Rake	GDN-0011	Mar 19, 2016	\$19.95	***
	Garden Cart	GDN-0023	Mar 18, 2016	\$32.99	****
	Hammer	TBX-0048	May 21, 2016	\$8.99	****
	Saw	TBX-0022	May 15, 2016	\$11.55	****
	Video Game Controller	GMG-0042	Oct 15, 2015	\$35.95	****

# Building the Component

### product-list.component.ts

```
import { Component } from 'angular2/core';

@Component({
    selector: 'pm-products',
    templateUrl: 'app/products/product-list.component.html'
})
export class ProductListComponent {
   pageTitle: string = 'Product List';
}
```

#### index.html

```
<body>
  <pm-app>Loading App...</pm-app>
</body>
```

#### product-list.component.ts

```
@Component({
   selector: 'pm-products',
   templateURL: 'product-list.component.html'
})
export class ProductListComponent { }
```

#### index.html

```
<body>
  <pm-app>Loading App...</pm-app>
</body>
```

#### product-list.component.ts

```
@Component({
   selector: 'pm-products',
   templateURL: 'product-list.component.html'
})
export class ProductListComponent { }
```

```
@Component({
    selector: 'pm-app',
    template:
        <div><h1>{{pageTitle}}</h1>
        <pm-products></pm-products>
        </div>`
})
export class AppComponent { }
```

#### index.html

```
<body>
  <pm-app>Loading App...</pm-app>
</body>
```

#### product-list.component.ts

```
@Component({
   selector: 'pm-products',
   templateURL: 'product-list.component.html'
})
export class ProductListComponent { }
```

```
@Component({
    selector: 'pm-app',
    template:
        <div><h1>{{pageTitle}}</h1>
        <pm-products></pm-products>
        </div>`,
    directives: [ProductListComponent]
})
export class AppComponent { }
```

#### index.html

```
<body>
  <pm-app>Loading App...</pm-app>
</body>
```

### product-list.component.ts

```
@Component({
   selector: 'pm-products',
   templateURL: 'product-list.component.html'
})
export class ProductListComponent { }
```

#### app.component.ts

3

export class AppComponent { }

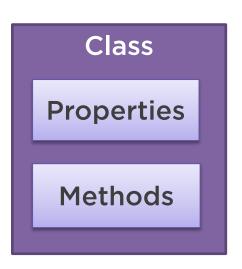

1 2

# Binding

Coordinates communication between the component's class and its template and often involves passing data.

Template

# Interpolation

### **Template**

```
<h1>{{pageTitle}}</h1>
{{'Title: ' + pageTitle}}

{{2*20+1}}

{{'Title: ' + getTitle()}}

<h1 innerText={{pageTitle}}></h1>
```

#### Class

```
export class AppComponent {
  pageTitle: string =
    'Acme Product Management';
}getTitle(): string {...};
}
```

# Directive

Custom HTML element or attribute used to power up and extend our HTML.

- Custom
- Built-In

### Custom Directives

#### app.component.ts

```
@Component({
    selector: 'pm-app',
    template:
        <div><h1>{{pageTitle}}</h1>
        <pm-products></pm-products>
        </div>
        ,
        directives: [ProductListComponent]
})
export class AppComponent { }
```

#### product-list.component.ts

```
@Component({
   selector: 'pm-products',
   templateURL: 'product-list.component.html'
})
export class ProductListComponent { }
```

### Angular Built-in Directives

**Structural Directives** 

\*ngIf: If logic

\*ngFor: For loops

### \*nglf Built-In Directive

```
    <thead>
    </thead>
```

# \*ngFor Built-In Directive

```
{{ product.productName }}
 {{ product.productCode }}
 {{ product.releaseDate }}
 {{ product.price }}
 {{ product.starRating }}
```

# Local Variable

### for...of vs for...in

### for...of

- Iterates over iterable objects, such as an array.
- Result: di, boo, punkeye

```
let nicknames= ['di', 'boo', 'punkeye'];
for (let nickname of nicknames) {
  console.log(nickname);
}
```

#### for...in

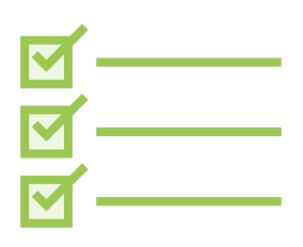

- Iterates over the properties of an object.
- Result: 0, 1, 2

```
let nicknames= ['di', 'boo', 'punkeye'];
for (let nickname in nicknames) {
  console.log(nickname);
}
```

# \*ngFor Built-In Directive

# Checklist: Template

### Inline template

- For short templates
- Specify the **template** property
- Use the ES 2015 back ticks for multiple lines
- Watch syntax

### Linked template

- For longer templates
- Specify the **templateUrl** property
- Define the path to the HTML file

# Checklist: Component as a Directive

### product-list.component.ts

```
@Component({
   selector: 'pm-products',
   templateURL: 'product-list.component.html'
})
export class ProductListComponent { }
```

# Checklist: Interpolation

### One way binding

- From component class property to an element property.

### Defined with double curly braces

- Contains a template expression
- No quote needed

### Checklist: Structural Directives

### \*ngIf and \*ngFor

- Prefix with an asterisk
- Assign to a quoted string expression

### \*ngIf

- Expression is evaluated as a true or false value

### \*ngFor

- Mark the local variable with #
- Specify 'of': '#product of products'

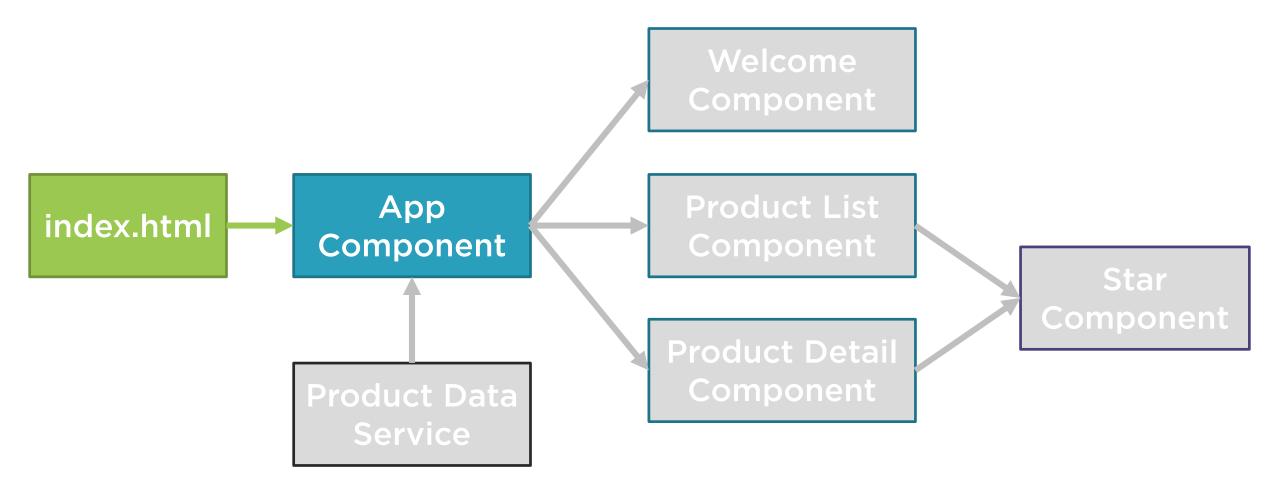

### Summary

Building a Template
Using a Component as a Directive
Binding with Interpolation
Adding Logic with Directives
